

SELECT QUESTIONS

1. Title

1757. Recyclable and Low Fat Products

Idea / Problem Statement

You are given a list of products with two attributes:

- whether the product is **low fat**
- whether the product is **recyclable**

Your task is to **find the IDs of products that satisfy both conditions at the same time:**

- low_fats = 'Y'
- recyclable = 'Y'

The order of results does **not** matter.

Tables Involved

Products

Column Name	Type	Description
product_id	int	Unique ID of the product (Primary Key)
low_fats	enum ('Y','N')	Indicates if the product is low fat
recyclable	enum ('Y','N')	Indicates if the product is recyclable

Solution (SQL Query)

```
SELECT product_id
FROM Products
WHERE low_fats = 'Y'
AND recyclable = 'Y';
```

2. Title

584. Find Customer Referee

Idea / Problem Statement

You are given a list of customers and the ID of the customer who referred them.

You need to **find the names of customers who:**

- were **not referred by customer with id = 2, OR**
- were **not referred by anyone at all** (referee_id IS NULL)

The output order does **not matter**.

Tables Involved

Customer

Column Name	Type	Description
id	int	Unique customer ID (Primary Key)
name	varchar	Customer name
referee_id	int	ID of the customer who referred them (can be NULL)

Solution (SQL Query)

```
SELECT name
FROM Customer
WHERE referee_id != 2
OR referee_id IS NULL;
```

3. Title

595. Big Countries

Idea / Problem Statement

You are given information about countries, including their **area** and **population**.

A country is considered **big** if **at least one** of the following conditions is true:

- Area is $\geq 3,000,000 \text{ km}^2$
- Population is $\geq 25,000,000$

Your task is to **find the name, population, and area** of all such big countries.

The result order does **not matter**.

Tables Involved

World

Column Name	Type	Description
name	varchar	Country name (Primary Key)
continent	varchar	Continent of the country
area	int	Area of the country (km^2)
population	int	Population of the country
gdp	bigint	GDP value

Solution (SQL Query)

```
SELECT name, population, area
FROM World
WHERE area >= 3000000
      OR population >= 25000000;
```
